YELLOW JACKET® AMS™

The "Build to Suit" Cable Protector System

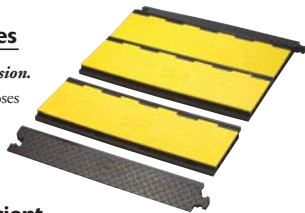

The **YELLOW JACKET AMS™** (*Advanced Modular System*) is the first cable protector system designed to grow with a user's needs. Now a user can "build" a cable protector system on-site to:

- Accommodate additional cable runs
- Add ADA compatible ramps
- Tailor it for restricted floor space
- Interface with a broad range of existing cable protector systems
- Handle almost any traffic, from foot traffic to high speed, heavy vehicular traffic.

Holds An Unlimited Number of Cables

YELLOW JACKET AMS™ systems are designed for expansion.

- Protect an additional 5, 50 or more cables, lines or hoses
- Simply add more center sections to expand
- Each additional center section has five channels

**Yellow Jacket...
Always the
Innovator!**

Space Efficient

YELLOW JACKET AMS™ protectors are the most space efficient cable protector systems in use, transit or storage.

- The center section's straight edges reduce the space needed for multiple parallel cable runs
- One side of center section fits flush to a wall saving space and eliminating a potential trip hazard
- All ramps can be detached when not in use, requiring less space in transit and in storage

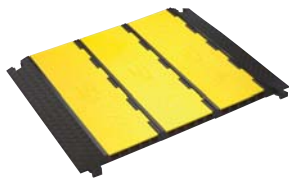

First Superfloor™

The Most Stable Cable Protector System Connect YELLOW JACKET AMS™ parallel cable protectors together to form a Superfloor, a truly stable, flat surface.

- No gaps between parallel cable connectors
- Ramps are attached using Hipersnap™ locking devices
- Hour Glass™ connectors hold cable protectors in line and in place

The resulting Superfloor will stay connected under very demanding usage and greatly reduces any chance of trip hazards.

Expandable ADA Compatible Ramps

ADA compatible special access ramps provide unmatched stability and expandability.

- Several ramps may be combined to form an extra wide ramp for easier access
- Ramps provide excellent access for forklifts and other small vehicles

Cable protector systems cannot, nor are they warranted, to prevent trips and falls.

CABLE PROTECTORS

Connects with Other Cable Protectors

The **YELLOW JACKET AMS™** connects directly to cable protectors using the dog bone connector with its **AMS Interconnect™**. The Interconnect:

- Protects your investment in Yellow Jacket Classic and other cable protectors using the dog bone connector. The dog bone connector was developed by Yellow Jacket, Inc. and is licensed to others.
- Is a fully functional, half-length (18") cable protector
- Has dog bone and Hour Glass™ connectors on opposite ends
- Forms a strong, stable connection without gaps

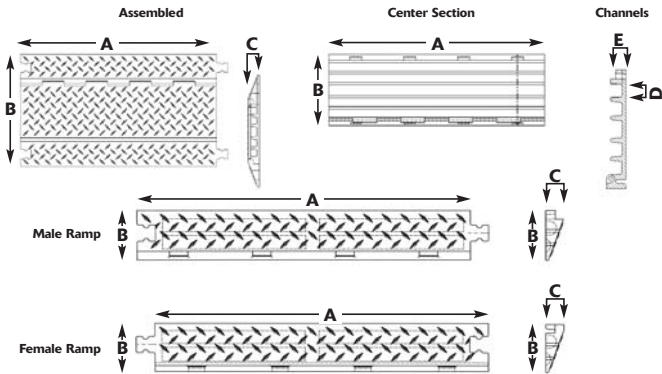

Built with Yellow Jacket® Strength

The **YELLOW JACKET AMS™** is built with the strength of the well known Yellow Jacket®. Yellow Jacket's superior performance is due to its combination of:

- Long lasting proprietary Durathane™ polyurethane
- Extra strong 2" leading edge with Roman Arch™ construction
- A 3/8" thick lid and 3/8" thick base
- Low angle ramps that are easy for vehicles to cross

YELLOW JACKET AMS™ is the premier solution for protecting valuable cables and connectors, meeting ADA and other regulatory requirements.

Drawings are representational and are not necessarily to scale.

Components and Dimensions (5-Channel System)

DESCRIPTION	MODEL #	Length (A)	Width (B)	Height (C)	Weight (lbs.)	Channels Width (D)	Height (E)	Maximum Ramp Angle
Assembled <i>(center section and 2 ramps)</i>	YJ5-125-ASAH	36"	22.5"	1.90"	28	1.25"	1.20"	20°
Center Section	YJ5-125-ACAS	36"	12.0"	1.90"	16	1.25"	1.20"	n/a
Male Ramp	YJ5-125-RMAH	36"	5.6"	1.90"	6.2	n/a	n/a	20°
Female Ramp	YJ5-125-RFAH	36"	4.9"	1.90"	6.1	n/a	n/a	20°
